Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
	10/599,671	JUNG ET AL.				
Office Action Summary	Examiner	Art Unit				
	Elli Peselev	1623				
The MAILING DATE of this communication appo Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1623

The abstract of the disclosure is objected to because it has not been presented in the proper domestic form. Correction is required. See MPEP § 608.01(b).

Claims 1-8, 12, 13 and 15-22 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a hydrocarbyl group containing 1 to 4, for alkyl group containing 1 to 6 carbon atoms and for cyclalkyl group containing 3 to 6 carbon atoms carbon atoms, does not reasonably provide enablement for "chemical substituent", "hydrocarbyl group"(claim 1), "aryl", "heteroaryl" (claim 5) and "chemical substituent" (claim 6). The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims.

A conclusion of lack of enablement means that, based on the evidence regarding each of the factors below, the specification, at the time the application was filed, would not have taught one skilled in the art how to make and/or use the full scope of the claimed invention without undue experimentation.

(A) The breadth of the claims.

The terminology "chemical substituent" encompass all chemical compounds, organic and organic such as polysaccharides, proteins, steroids etc.

The terms "hydrocarbyl", "aryl" and "heteroaryl" are not limited to any number of carbon atoms and therefore encompass very large moieties which probable will interfere with the function of the claimed compounds.

(B) The level of predictability in the art.

It is well established in the pharmaceutical art that even minor changes in the chemical structure of a compound can lead to unpredictable results in the function of said compound.

(C) The amount of direction provided by the inventor.

The specification fails to provide specific definations of the claimed terms.

(D) The existence of working examples.

The working examples are limited to substituents having small number of carbon atoms.

((E) The quantity of experimentation needed to make or use the invention based on the content of the disclosure.

Because there is no way to predict a priory which specific compounds encompassed by the present claims will have a desired activity, it would take and enormous amount of trial and error to test various compounds for their activity.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elli Peselev whose telephone number is (571) 272-0659. The examiner can normally be reached on 8.00-4.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shaojia Jiang can be reached on (571) 272-0627. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
